In Place Of Awards, This Year Responsible Care Launches Two Online Galleries To Showcase Industry Initiatives-hbr2

**Climate Change & Energy, Responsible Care**

Responsible Care Gallery

The Responsible Care Awards has taken a different approach this year. In place of the awards, two online galleries show some of Responsible Care participating companies' initiatives; to support Ukraine, and to improve resource efficiency.

Under the gallery for 'humanitarian aid', the exhibition reveals how companies gathered and distributed financial donations, other projects offer insights into partnerships with various charities and local governments to help understand local needs, and ensure the delivery food, water, clothing and healthcare reached those who most need it. This category features how companies organised accommodation, including stopover points, and how employees got practical; renovating and decorating apartments to host Ukrainian families. The gallery also shows how employees have supported displaced families to settle into new territories by helping Ukrainian people apply for visas and secure jobs, and ensure children access education, daycare and other 'normal' activities

A second Responsible Care gallery shares how European companies are responding to increasingly urgent demands for increased resource efficiency. Initiatives show how companies are diversifying energy by moving to renewables and bio-based, including for feedstock, heavy-duty transport and by offering new product ranges. Accelerating a circular economy is also a goal of many projects, for instance, through enabling the recycling of

polyurethane foam mattresses. Others shared online guidance to increase circularity and offered mentoring programmes to improve climate performance.

The exhibitions showcase just some initiatives, among many others, from Responsible Care companies.

2022 European Responsible Care® Awards

This year European Responsible Care® launches two online galleries

Responsible Care has taken a different approach this year. In place of the awards, two online galleries show some of Responsible Care participating companies' initiatives. One is to support humanitarian aid given the impacts of the war in Ukraine, and the other is to improve resource efficiency.

We invite you to take a look at just some of these ongoing projects led by Responsible Care practicing companies.
